Time to put Ebola in context: viruses that cause haemorrhagic fevers have been popularized by the media as fierce predators that threaten to devastate global populations. Professor Melissa Leach says there is much to learn from combining local and scientific knowledge in dealing with these deadly pathogens. (1 C.E.). *Bulletin of the World Health Organization*, 88(7), 488-489. <https://doi.org/10.2471/BLT.10.030710>
